

Restore Datashred Customer Portal

As part of our commitment to you to provide the very best customer service, we are proud to offer all our customers the Restore Datashred online portal.

We believe by listening to our customers and taking on board what you tell us you need to make your jobs easier, we can make your processes more efficient.

Our new, improved customer portal **//myportal.restore.co.uk//** is our latest project to demonstrate this attention to detail. The portal has a number of new features, upgraded navigation and access to all sorts of company and policy documents. Our aim is to give you quick and easy access to the information you need to keep on top of day-to-day processes, as well as regular, accurate details collated for your management account reporting.

Account control

We've designed access so that you are in the driving seat of everything that happens in your account. Simply log in to view the easy-to-use dashboard and use it as a tool to administer each step of the paper and assets disposal process, from viewing site collections and tracking their progress right through to their secure destruction.

Unbroken chain of custody

From the menu listing on your dashboard you have transparency and visibility of collection notes, tracking reports and certificates of destruction. These documents give peace of mind that your sensitive data and assets are being handled in compliance with data protection regulations and retention guidelines.

Round-the-clock access

Working late? You can still check transactions, reports and invoicing when it suits you, even if our customer support team are tucked up in bed!

Carbon footprint checker

View your environmental impact directly on the dashboard. Figures for the number of trees that have not been felled, for the savings in electricity, carbon dioxide and water, and the tonnage that has not entered landfill are all visible here.

Features

- View your past and future visits or download your service schedule
- Request a visit
- Download or view any paperwork
- Find out how much energy, water and how many trees you have saved
- View some of our products
- View and download useful company information such as our Waste Carriers Licence or environmental policies
- See our FAQs

The environment

We're serious about sustainability

We're serious about our shared environmental responsibility, too. That's why we're Environment Agency waste carrier accredited and we recycle 100% of the paper we process.

The Restore Datashred promise

We are committed to minimising our impact on the environment wherever possible and, as such, have implemented robust environmental targets. In the past three years we have reduced our fuel usage by 25% and are proud to boast a zero-landfill policy.

Your security and confidentiality are our priority. We work closely with our customers to ensure that the highest standards of data protection are maintained. We provide a safe and secure solution for the shredding of confidential materials, including paper documents, archive records, ID cards, uniforms, hard drives, CDs, USB sticks and legacy media.

We offer additional services

Restore Records Management – store and manage all your business-critical documents, back-up tapes and heritage items with the largest UK-owned records management company.

Restore Digital – security and compliance to the highest industry standards for all your digital transformation and workflow solutions.

Restore Datashred – scale, efficiency, value and unrivalled customer service from the UK's leading document destruction provider.

Restore Harrow Green, Moving Professionals – from creating effective workspaces to business and technology moves and storage, whatever the sector, we are the market leader in commercial relocation.

Restore Technology – from installation to relocation, resale and recycling, we optimise and manage the entire journey of your business hardware.
