THE BUNKER

EX-MINISTRY OF DEFENCE COMMAND AND CONTROL FACILITIES PROVIDE AN ULTRA SECURE ENVIRONMENT FOR OUR SYSTEMS

The Bunker's hosting facilities are:

1. Ultra secure – state-of-the-art Datacentres are ex-Ministry of Defence command and control facilities that provide an ultra secure environment for our systems.

2. Ultra available – in addition to auto-failover, we replicate our systems in one of their secondary nuclear grade delivery centres.

Kent Facilities

With The Bunker our systems will be kept Ultra Secure and out-of-town within the UK's most secure Datacentre environment.

The Bunker operates and supports the most secure Datacentres developed today and can facilitate the toughest and most demanding requirements.

The Bunker offer market leading solutions for power, space, security, support, flexibility and scalability with a high level of availability, resilience and redundancy built into their Datacentres by their very design. Our Kent facility is N+1 and offers carrier independent colocation.

Physical

- 3.5m high perimeter fence
- Solid steel doors
- CCTV
- Tempest RFI intrusion protection
- Sophisticated access controls
