

Dovetail

File Tracking And Asset Management

Gain Control Of Your Data

We'd like to ask you a personal question: are you in control of your data? Do you know where everything is and can you access it right now? Today's speed of corporate life and service expectations make it crucial to always hit the ground running.

What if we said you could lock down your on-site chain of custody, increase productivity and ensure your business is future-proofed and responsive to all new data protection regulations.

Does this sound like a pipedream? Not if you choose Dovetail.

Dovetail is our on-site file tracking software that closes the loop to give you complete visibility and accountability of all local and stored data.

Any time, any place, anywhere – that's the beauty of electronic file tracking. Locate your asset, call it up and it can appear on your desk within just hours. Knowing exactly where a document is saves your valuable time and your patience, again and again.

Dovetail interfaces beautifully with your existing management systems and blends seamlessly with our own O'Neil's document management software.

Benefits of Dovetail

Total Control

Track all of your records, both in your company's premises or in off-site storage.

Complete Lifecycle

Manage the complete lifecycle of your files, with a full audit history, up to the point of secure destruction.

Help with GDPR Compliance

Dovetail can help solve important GDPR-related challenges by integrating multiple data sources.

Saves Space

Reduce archive size by up to 20% through superior auditing of retention periods and disposal deadlines.

Improve Efficiency

A single management hub, which ensures the correct levels of access, privacy and security and increases productivity by up to 25%.

No Complex Installation

Global views, reports and easy configuration.
