## Datashred

### Our services

### Secure, nationwide shredding services

Restore Datashred is one of the UK's leading shredding services suppliers. We have a nationwide network of specialised shredding centres and more than 200 collection and mobile shredding vehicles. We are committed to providing highly secure, confidential shredding services wherever you are in the UK, and every year we shred and recycle more than 100,000 tonnes of material, including: paper documents, archive records, ID cards, uniforms, hard disk drives, CDs, USB sticks and legacy media.

From customer service to security, to our environmental responsibilities – we are always 'serious about shredding'. We work closely with you, whether we're shredding on or off site, to make sure we close all the gaps for risk and maintain the highest standards of data protection at all times.

On-site shredding

Off-site shredding

Regular & one off collections

Paper, media & hard drives, product & textile destruction

Accreditations

# Restore

Restore plc is an AIM-listed support services company focused on providing services to offices and workplaces in the private and public sectors. Our five businesses complement each other perfectly in the range and depth of office services we provide for our customers, which is one of the reasons why we are the largest UK-owned business of its kind.

[www.restore.co.uk](http://www.restore.co.uk)

At Restore Datashred we provide state-of-the-art shredding and customer service excellence, while our other businesses excel in records management, business process outsourcing, commercial relocation and IT asset management and disposal.

Securely disposing of years' worth of obsolete files and digital media such as hard disk drives and USB sticks is grist to our mill. To speed efficiency and lower costs, our colleagues, Restore **Records Management** and Restore **Digital**, can help you set up secure archive storage, retrieval and digitisation systems and processes, as well as workflow automation. One thing leads to another and all that freed-up floor space gets earmarked for a new department or server room – no problem. Our expert teams at Restore **Harrow Green** can provide a thoughtful, hassle-free relocation experience and at Restore **Technology**, they will install the servers and take away all your redundant PCs for re-use or recycling. Office services 'under one roof', you could say.

## Records

Storing and managing your business-critical documents, back-up tapes and heritage items.

## Digital

Providing digital transformation solutions and streamlined workflows, data and document scanning.

## Datashred

A leading provider of document destruction, with 12 secure shredding centres across the UK.

## Relocation

The market leader in commercial relocation, providing moves and storage for all sectors.

## Technology

The complete set of services for your IT assets, from installation to relocation, resale and recycling.
