#RestoreAnswers

Restore are excited to announce that an electronic signature service is now available for DocuWare.

## The electronic signature for any scenario

### Public administration

Handwritten signature, without any need for previous knowledge or possession of any electronic device.

### Citizen advice bureau and other service points

The alternative to paper for face-to-face signatures in offices and at counters.

### Mobility solutions

Agile signature solutions multiply the acquisition success of partners and clients.

### Informed consents

Health consents become simpler, safer and more patient friendly.

### New data protection regulation (GDPR)

We offer all options to obtain the unambiguous consent of the interested party.

### Human resources

It is no longer necessary to post documents or send staff to different locations.

## Validate ID

Offers security and ease of use for electronic signature processes and digital identity verification. Our services help to reduce paper use and improve the workflow of teams and people.

## VID Signer

Is the safest and easiest way to obtain electronic signatures. It is a SaaS electronic signature service for face to face and remote scenarios. It combines the simplicity of use with the security of cryptography and biometrics.

**Easy to sign**

**Very similar to signing in paper**

**What you see is what you sign**

**Transparent use of certificates**

**Strong biometric evidence**

**Great for person (walk-ins) signers**

## The benefits of signature

**Biometric – handwritten signature for face-to-face and mobility environments**

**Centralised – your documents are safe and accessible at any time**

**Remote – for anyone and anywhere**

**NFC – qualified signature with smartcards**

**Stamps – simpler processes with the electric seal**

**Less paper, more savings**

**Mobile work in any place**

**Faster and safer**

**Easy integration**

**Legal accompaniment**

**Direct access to documents**

**File integrity**

**Space-saving due to secure digital storage**

## Types of Signature

### Bio

Handwritten signature for face-to-face scenarios

### Qualified face to face

Our dynamic solution for Germany

### Centralized

Certified based signatures using remote HSM

### Remote

Advance signature based on OTP for remote scenarios

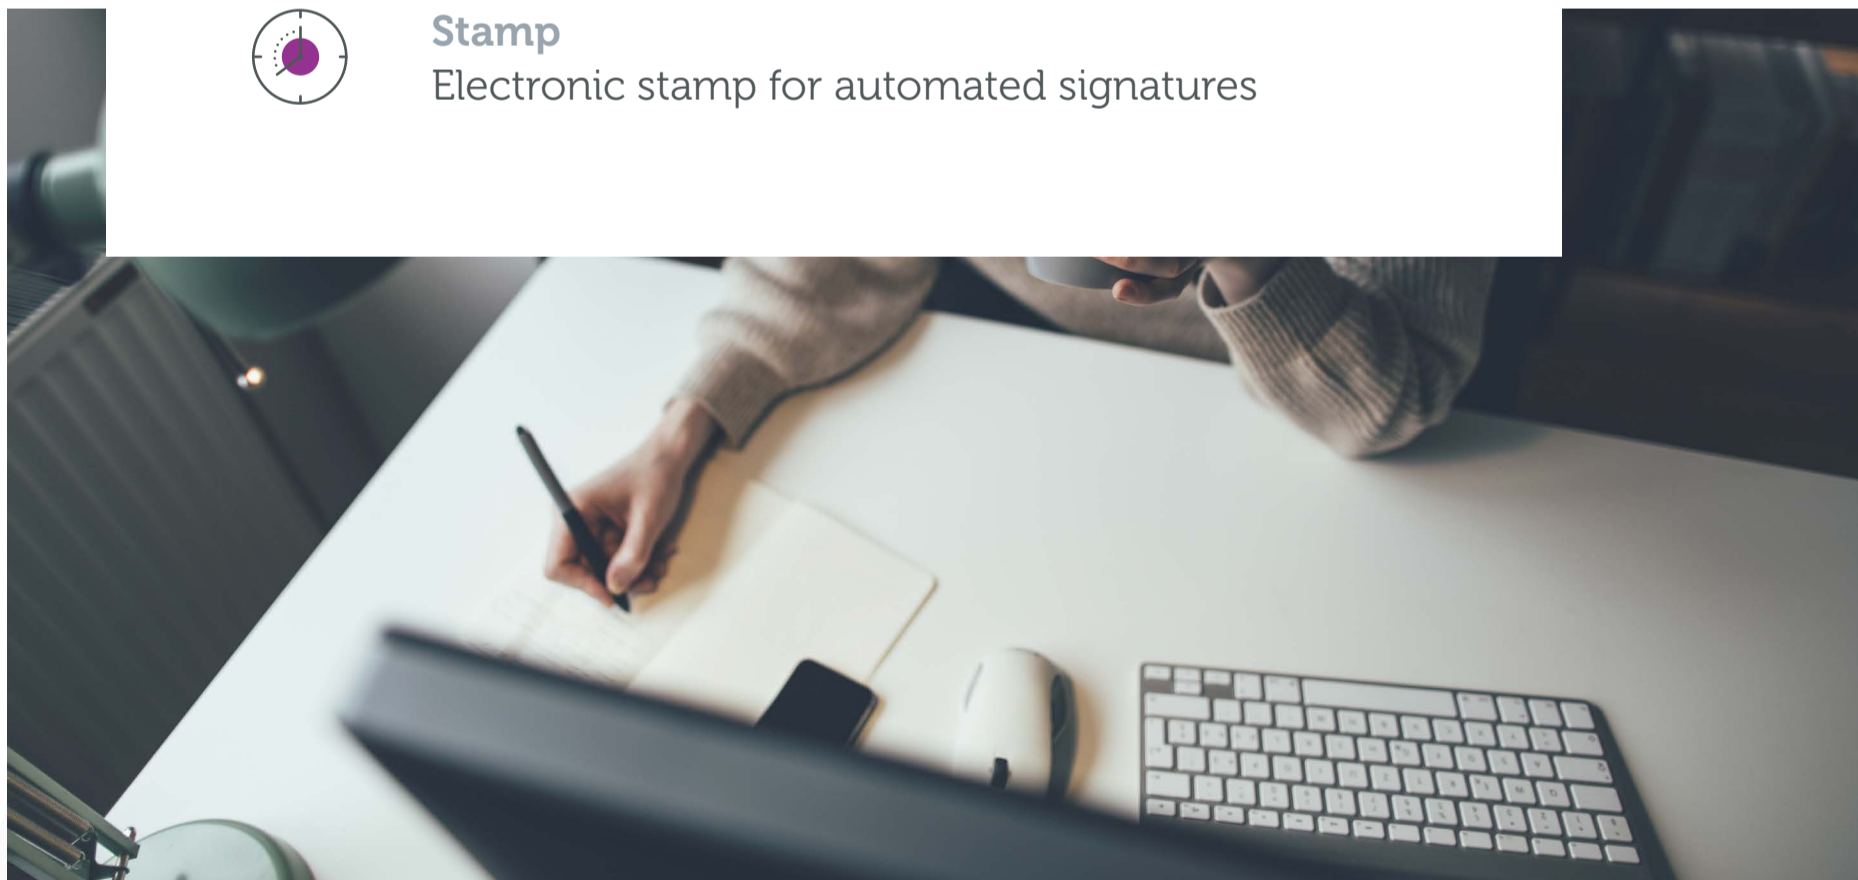

### NFC

Smartcard signature. Sign for mobile or PC

### Stamp

Electronic stamp for automated signatures

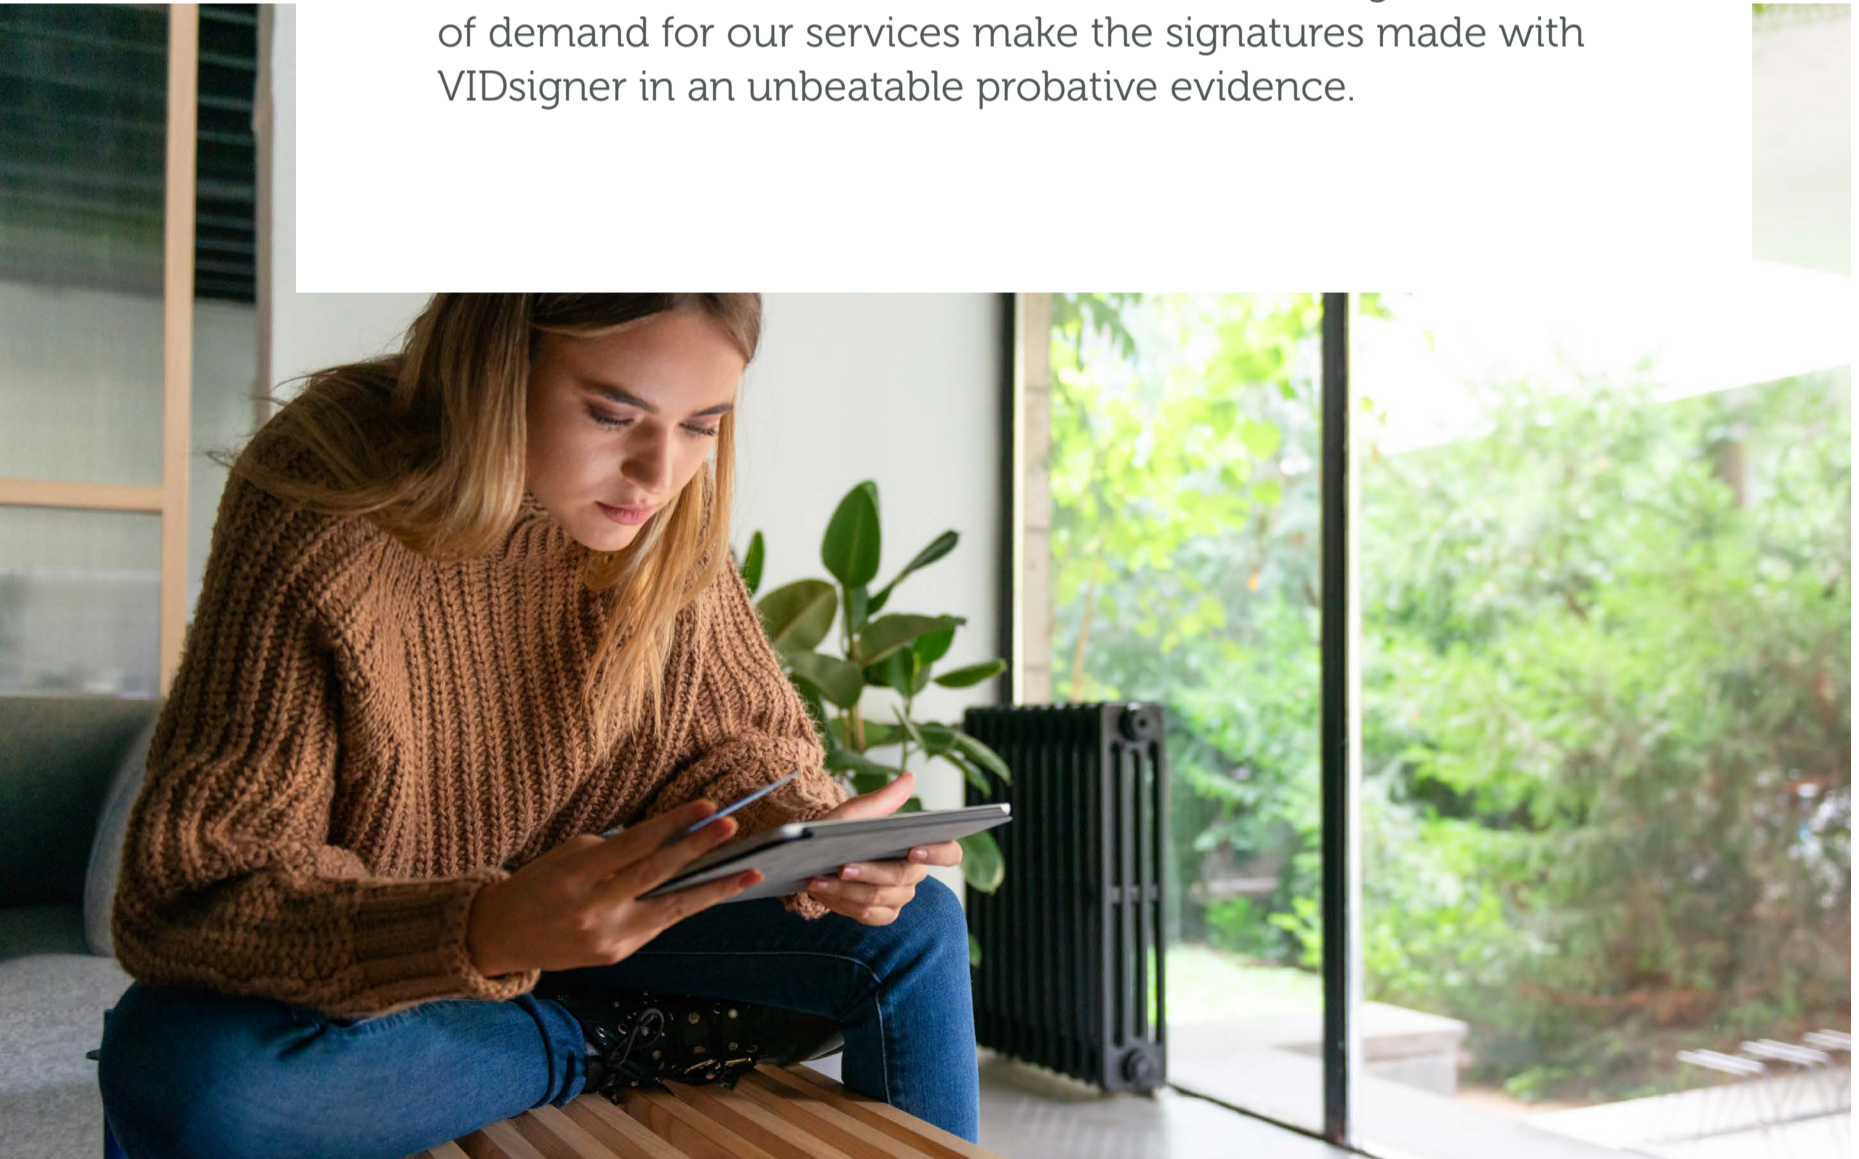

## EU-eIDAS

Regulation (EU) 910/2014 on electronic identification and services trust (eIDAS) has given a new impulse to third party services. VIDsigner is set up as a trust service in the eIDAS field, causing them to get signatures qualified in appropriate contexts.

## Worldwide

VIDsigner facilitates electronic transactions among different countries of the EU and the rest of the world. High levels of demand for our services make the signatures made with VIDsigner in an unbeatable probative evidence.

# Who we are

Restore Digital is part of Restore Plc and together we provide the complete solution to organisations' document and data management.

At Restore Digital we help organisations empower their data, with security, auditability and compliance as the backbone.
